### PROFILE

A passionate front-end developer with experience in creating responsive designs, optimizing code, and implementing API integration. Proficient in HTML5, CSS/SCSS, JavaScript, React.js, and various designing frameworks such as Bootstrap, and Tailwind CSS. Well-versed in component-based architecture, state and props management, and version control. A problem solver with a strong ability to adapt and thrive in dynamic, collaborative environments.

### TRAININGS

#### Front-end web development

CodeAlpha

August' 2023 to September' 2023

- Developed new user-facing features using HTML5, CSS3, and JavaScript, ensuring high functionality and an exceptional user experience.
- Built reusable code and libraries for future use, increasing development efficiency and maintaining consistency in code structure.
- Ensured technical feasibility of UI/UX designs and optimized applications for maximum speed and scalability.
- Validated all user inputs before submitting them to the back end, ensuring data security and integrity.

### PROJECTS

#### E-commerce Website

Skills covered - HTML, CSS,  
Dummy JSON API, JavaScript

November' 2023

- Using JavaScript Promises to fetch the data from Dummy JSON API and display it on cards with the help of HTML and CSS.
- Created reusable code for later usage, improving development productivity and preserving code structure consistency.
- Users can Click on the Buy Now button after that a new page opens and whatever products the user selects will be displayed and they can easily edit their product's quantity and delete them.
- With the help of GitHub pages, I have deployed my website so that users can interact with my web page.
- Live website - <https://avi2492.github.io/E-commerce-shop/>

#### Weather Forecast Website

Skills covered - React.js, Tailwind  
CSS, API Integration

October' 2023

- Using React.js, Tailwind CSS, and Open Weather API, new user-facing features were developed, guaranteeing excellent functionality and a remarkable user experience.
- Created libraries and reusable code for later usage, improving development productivity and preserving code structure consistency.
- Users can enter their City and state names to know about temperature, humidity, climate, and wind speed.
- Live website - <https://weatherapp-pearl-eta-70.vercel.app/>
